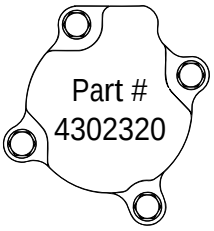
Topic:

Installing Auxiliary Countershaft Mounted Oil Pumps on 10, 13, and 18 Speeds

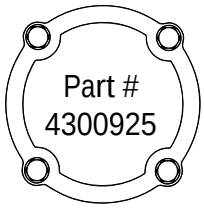
Two different auxiliary mounted oil cooler kits are available for installation on the models listed below. When ordering a kit or pump for any one of these model refer to the illustrations to make the correct choice.

MODEL SERIES	SERIAL NUMBER
RTLO/F-12713A and RTLO/F-14713A	51126209
RTL/F-11710B and RTL/F-12710B and RTL/F-13710B and RTL/F-14710B	51129440
RTLO/F-14610B	51130829 and 70765646
RTLO/F-11610B and RTLO/F-12610B and RTLO/F-13610B	51135817 and 70768176
RTLO/F-14718B	51130451

To determine which pump to use refer to the illustrations and parts numbers that follows.



If the countershaft rear bearing cover looks like this use:
Oil Cooler Kit Number K-3126
Oil Pump # A-6654 (contained in K-3126)
The transmissions that use this pump will have serial numbers greater than those listed above.



If the countershaft rear bearing cover looks like this use:
Oil Cooler Kit Number K-2842
Oil Pump # A-5941 (contained in K-2842)

Note: If the serial tag is missing or illegible reference the shape of the rear bearing cover to make the correct choice for the oil cooler kit or pump. Also, transmissions rated 1550 lb. ft. or more come equipped with an internal oil cooler as standard equipment. Internal pumps for transmissions rated less than 1550 lb. ft. are optional equipment.
